Index to Volume 15

Abdominal pressure, at different lung volumes, 1087
Abelmann, W. H., 619
Acceleration
  animal centrifuge for prolonged operation, 753
  cardiovascular changes, 1065
  carotid pressure and end point during, 903
  effect on blood creatine, creatinine, and inorganic phosphorus, 271
  forward, ventilatory response to, 907
Acclimatization: *see* Temperature, environmental
Acetazolamide, effect on mixed venous carbon dioxide tension in anesthesia, 390
Acetylcholine, effect on bronchial dimensions in apnea, 229
Acid-base, extracellular-intracellular relationships, determination using ammonia-ammonium buffer pair, 527
Acidemia, respiratory, effect on cardiac and skeletal muscle electrolytes, 459
Acidosis, respiratory, effect on tissue carbon dioxide concentrations, 49
Action potentials: *see* Potentials
Adams, J. E., 189, 999
Adolph, E. F., 435, 911, 1075
Adrenaline, effect on plasma Stypven and thromboplastin time, 605
Adrenolytic action, of ergot alkaloids on dog kidney, 109
Adults: *see* Age
Age
  and gastric hunger contractions, 133
  infants and adults, pulmonary ventilatory responses to hypoxia, 1075
  infants and children, ulnar nerve conduction velocity and H-reflex, 1
  newborn, anoxic death, respiratory and cardiovascular alterations, 249
Agostoni, E., 349, 1087, 1093
Aikawa, J. K., 503
Air: *see* Respiratory air
Airway pressure, resistance: *see under* Respiratory system
Akutsu, T., 18
Albumin, iodinated, serum, inhomogeneity as detected with rat liver, 961
Alcohol intoxication, effect on uropepsin excretion, 995
Alcoholism, cerebral metabolism in, 189
Alexander, J. K., 781
Alkalemia, respiratory, effect on cardiac and skeletal muscle electrolytes, 459
Alkaloids, ergot, adrenolytic and sympatholytic action on kidney, 109
Allweis, C. L., 949
Altitude
  effect on alveolar-arterial oxygen gradient, 796
  effect on plasma potassium, 37
  hypoxic stimulation of breathing, effect of sleep on, 1130
  tolerance, and restraint adaptation, 921
Altitude chamber, temperature-controlled, low-cost, 1146
Alveolar air: *see* Respiratory air
Alveolar-arterial oxygen: *see* Oxygen
Alveoli
  capillaries, temperature of, 10
  CO_2 tension, increased, effect on pulmonary diffusing capacity for CO in man, 543
  CO_2 time course, mathematical analysis, 215
  negative pressure, effect on pulmonary diffusing capacity, 372
  pCO_2 control system, use to magnify respiratory depression by meperidine, 43
  ventilation: *see* Lungs
Amino acids, urinary, excretion, seasonal variations, 121
4-Aminoantipyrine, in determination of organ blood flow, 1139
Ammonia-ammonium buffer pair, in determination of extra-cellular-intracellular acid-base relationships, 527
Ammonium, acidic dissociation constant, effect of urinary solutes, 125
Analyzer, respiratory gas: *see* Respiratory gas
Andersen, K. L., 635, 645, 649, 654, 659, 771
Andresen, D. C., 796
Anesthesia
  respiratory dead space and arterial end-tidal carbon dioxide tension difference, 383
  venous admixture in pulmonary circulation, 418
  venous carbon dioxide tension in, effect of carbonic anhydrase inhibition, 390
Animal centrifuge for prolonged operation, 753
Anoxia, neonatal death from, respiratory and cardiovascular alterations, 249
Aorta
  cannulation, permanent, 727
  grafts, polyurethane, 18
Apnea, effect on dimensional responses of bronchi to airway pressure, gases and drugs, 229
Arborelius, M., Jr., 169, 595
Arctic inhabitants
  circulation of heat to hands, 662
  heat output from hands, 771
  physical fitness, 645
  metabolism and temperature, 635
  thermal and metabolic responses to moderate cold exposure, 659
Argentaffine cells, in mediation of hypoglycemic effect of tolbutamide, 684
Armstrong, W. D., 508
Arnett, Elizabeth L., 499
Arrest, cardiac, bipolar pacemaker for immediate treatment, 974
Arrhythmia, respiratory sinus, laws derived from computer simulation, 863
Arteries: *see also* specific artery or anatomical location
  alveolar-arterial oxygen pressure difference, distribution component, 235
  CO_2 tension, in anesthesia, 383
  pressure
    effect of CO_2 inhalation, 454
    relation to variations in digital volume, 23
  pressure change, velocity and acceleration of, 747
  pulse waves, reflections in, 258
Ashe, W. F., 1001
Assali, N. S., 533
Aspiration, sea water, treatment of, 1113
Åstrand, P.-O., 220
Atherosclerosis, in hyperlipemia, effects of inositol phosphatide, 983
Atmospheric pressure
  effect of breathing O_2 at 1 atmosphere on O_2 consumption, 53
  explosive decompression, tolerance to, in fetal posture, 589
  pressure-suit inflation, effect on pulmonary diffusing capacity, 843
Atropine, effect on bronchial dimensions in apnea, 229
Attinger, E. O., 429
Auditore, J. V., 25, 275
Augmentor action of sympathetic cardiac nerves, 629
Ayala, G. F., 1150

Balchum, O. J., 62
Ballistocardiogram: *see* Heart
Bank, N., 125
Barnes, J. R., 31
Barnett, T. B., 838
Barry, Jeanne Q., 37
Bartlett, R. G., Jr., 921
Basilar artery, subtemporal approach, 1150
Bass, D. E., 632
Beibel, W. R., 525
Bender, M. A., 520, 939
Berglund, E., 878
Berman, L. B., 393
Bernstein, H., 826
Bicher, C., 317
Bicarbonate ion, electrometric measurement, 729
Billings, C. E., Jr., 1001
Biological experiments, electronic stimulator for, 1143
Biological fluids: *see* Fluids
Bischoff, F., 515
Bishop, J. M., 893
Blatteis, C. M., 1146
Blevins, W. V., 741
Blood cells: *see* specific type of cell or anatomical location
Blood constituents: *see* specific constituent

Blood processes: *see also* under name of blood vessel or specific anatomical location
circulation, peripheral, study with photoconductive cell, 317
coagulation
effect of adrenaline, 605
factors, effect of heparin on, 945
in polycythemia vera, 1049
mechanisms, effect of extremity venous blood temperature, 598
role of ionic charges of glass, 265
flow
effect on diffusing capacity of isolated lungs, 883
measurement, thermistor bridge for, 966
measurement with gated sine wave flowmeter, 533
organ, determination using 4-aminoantipyrine, 1139
hematology, changes during muscular activity and recovery, 31
pressure
arterial: *see* Arteries, or specific artery
determination, indirect method, 323
effect on diffusing capacity of isolated lungs, 883
transducer for, 726
sampling system, distortion of indicator-dilution curves, 177
unstirred, measurement of oxygen tension with platinum electrode, 706
volume
digital, spontaneous variations, relation of arterial pressure to, 23
pulmonary: *see* Lungs
whole, oxygen diffusion into, 1123
Blood vessels: *see* name or anatomical location of vessel
Blood-borne vasodilators, from ischemic tissues, 1041
Bobbert, A. C., 1007
Body composition, effect on performance, 493
Body density, measurement, replicability of, as determined by underwater weighing, 142
Body fluids: *see* Fluids
Body position
and ventilatory pattern, effects on lung volume, 801
effect on ventilatory mechanics and strength, 561
'fetal' posture, effect on tolerance to explosive decompression, 589
lateral, effect on blood flow through lungs in unilateral hypoxia, 595
Body surface area
estimation of, in obese subjects, 781
nomogram for determination of, from height and weight, 958
Body temperature: *see* Temperature, body
Body weight: *see also* Obesity
effect on performance, 493
Bohr integration procedure, in measuring diffusing capacity of lung for oxygen, 337
Bolinger, R. E., 197
Bolstad, A., 635, 645, 649
Bondurant, S., 875
Bone, hyoid: *see* Hyoid bone
Bone marrow cells
survival during freezing and thawing in glycerol, 939
viable, preservation by freezing, 520
Bornstein, D. L., 855
Bornstein, P., 1157
Borst, H. G., 878
Bosma, J. F., 283
Boylan, J. W., 115
Bradley, B. E., 445
Brain, isolation and injection of arterial areas, 303
Breath-holding
during and after muscular exercise, 220
in determination of venous blood CO_2 tension, 225
Breathing
continuous pressure, cardiovascular adjustments during, 425
during brief exercise, 583
of oxygen at 1 atmosphere, effect on oxygen consumption, 53
of $S^{35}O_2$, pulmonary resistance and compliance with concurrent radioactive sulfur distribution, 62
maximal capacity, for prolonged hyperventilation, 1073
maximal work of one cycle, 1098
mechanical efficiency, 359
mechanical work of, during muscular exercise, 354
negative-pressure
cardiovascular responses, 557
effect on lung volumes, lung compliance, and airway resistance, 554
positive-pressure, intermittent, in treatment of drowning, 849
rebreathing technique, for determining blood CO_2 tension in congenital heart disease, 1159
role of diaphragm, electromyographic study, 1101
Breathing apparatus, testing methods and resistance standards, 1053
Bredell, G. A. C., 667
Briehl, R. W., 337
Briscoe, W. A., 723, 785
Brockway, J. M., 161
Brodie, D. A., 291
Brodkey, J. S., 501
Brody, A. W., 561
Bromberg, P. A., 527
Bronchi
air flow measurements, 976
dimensional responses in apnea to airway pressure, gases, and drugs, 229
Bromsulphalein, modified method for measurement of hepatic blood flow, 473
Brouha, L., 31
Brown, E. B., Jr., 49
Brown, W. H., 181
Bryce-Smith, R., 440
Bryson, G., 515
Bubble technique, for equilibration and maintenance of gas tensions in fluids, 963
Burbridge, T. N., 189
Burch, G. E., 23, 255, 624
Burch, N. R., 691
Buffering, CO_2, 393
Burns, of skin, after ultraviolet radiation, 489
Burroughs, W., 97
Burton, S. D., 128
Buskirk, E. R., 212
Burton, A. C., 201, 209

Cain, S. M., 390
Calandra, J. C., 101, 684
Calories, expenditure: *see* Energy expenditure
Campbell, Carol A., 1035
Candenbroucke, J., 314
Canham, R. G., 303
Cannulation, permanent, of aorta and vena cava, 727
Capillaries
alveolar: *see* Alveoli
of foot, fragility during cold exposure and starvation, 261
pulmonary: *see* Lungs
Carbon^{14}
respiration apparatus for studies with, 175
substrate labeled with, conversion to CO_2, 949
Carbon dioxide
alveolar time course, mathematical analysis, 215
buffering, in man, 393
concentrations, in tissue during respiratory acidosis, 49
conversion from a C^{14}-labeled substrate
electrometric measurement, 729
homeostasis during intravenous infusion, 807
inhalation, effect on arterial pressure, electrocardiogram, plasma catechol amines, and 17-OH ketosteroids, 454
inhalation and infusion, effect of hypothermia on ventilatory response, 397
inhaled, effect of salicylates on ventilatory response to, 826
pressure, alveolar control system, use to magnify respiratory depression by meperidine, 43
radioactive
in measurement of pulmonary blood flow and ventilation-perfusion ratio, 405
uptake in normal lung, regional variations, 411
stimulation of breathing in hypoxia, effect of sleep, 1135
tension
alveolar, increased; influence on pulmonary diffusing capacity for CO in man, 543
arterial to end-tidal difference in anesthesia, effect on respiratory dead space, 383
end-tidal, effect of pulmonary artery occlusion on, 87
in congenital heart disease, rebreathing methods of determining, 1159
venous, determination by breath-holding, 225
venous, effect of carbonic anhydrase inhibition in anesthesia, 390
Carbon monoxide, diffusing capacity of lungs, during exercise, 402

Carbonic anhydrase inhibition, effect on mixed venous carbon dioxide tension in anesthesia, 390
Cardiac arrest: *see* Heart
Cardiac output: *see* Heart
Cardiovascular system
adjustments during continuous pressure breathing, 425
alterations in neonatal anoxic death, 249
changes during acceleration stress, 1065
responses during negative - pressure breathing, 557
Carey, G. C. R., 70
Carleton, R. A., 619
Carotid artery
blood pressure and end point during acceleration, 903
blood temperature, 603
Carter, E. T., 1001
Cassin, B., 249
Cassin, S., 249
Catecholamines
excretion in cold exposure, 499
plasma, effect of carbon dioxide inhalation on, 454
Cavagna, G., 354
Cells: *see* specific type of cell or anatomical location
Central shivering: *see* Shivering
Centrifuge
animal, for prolonged operation, 753
multifield, for life-long exposure of small mammals, 307
Cerebrum, metabolism in problem drinkers, 189
Chaikoff, I. L., 949
Chalmers, J. P., 465
Cherniack, N. S., 907
Cherniack, R. M., 377
Children: *see under* Age
Chlorpromazine hydrochloride, in alcoholism, effect on cerebral metabolism, 189
Chorda tympani, section, effect on submaxillary gland secretion, 295
Christensen, M., 611
Chromatography, gas
adaptation of technique for use in respiratory physiology, 298
application to respiratory gas analysis, 829
Cirrhosis, hepatic, hypoxemia due to venous admixture, 253
Circulation: *see* specific anatomical location
Clark, R. E., 496
Close, P., 589
Clothing, records of, in demonstration of acclimatization to cold, 776

BOARD OF PUBLICATION TRUSTEES, AMERICAN PHYSIOLOGICAL SOCIETY

Philip Bard, *Chairman* H. S. Mayerson Hermann Rahn
Milton O. Lee, *Managing Editor* Sara F. Leslie, *Secretary of Publications*

AMERICAN PHYSIOLOGICAL SOCIETY 9650 Wisconsin Avenue, Washington 14, D. C.

Men of science complain of the lack of a wide appreciation of scientific knowledge; what else can they expect if they offer to the world only the dry bones of knowledge from which the breath has departed?

NORMAN CAMPBELL

Contents of Volume 15

No. 1. JANUARY 1960

Ulnar nerve conduction velocity and H-reflex in infants and children. *Thomas, J. E. and E. H. Lambert* 1

Alveolar-capillary temperature. *Rubenstein, E., R. C. Pardee and F. Eldridge* 10

Effect of environmental temperature on metabolic changes following physical injury. *Haist, R. E., R. D. Hawkins and G. V. Kovacs* 13

Aortic grafts of polyurethane in dogs. *Dreyer, B., T. Akutsu and W. J. Kolff* 18

Relation of arterial pressure to spontaneous variations in digital volume. *Burch, G. E. and N. DePasquale* 23

Role of pH and thrombin in the PNH hemolytic system. *Auditore, J. V., R. C. Hartmann and J. M. Flexner* 25

Hematological changes during muscular activity and recovery. *De Lanne, R., J. R. Barnes and L. Brouha* 31

Early effect of moderate altitude stress on plasma potassium in the dog. *Gold, A. J., J. Q. Barry and F. P. Ferguson* 37

Lung volumes of singers. *Heller, S. S., W. R. Hicks and W. S. Root* 40

An alveolar pCO_2 control system: its use to magnify respiratory depression by meperidine. *Lambertsen, C. J. and H. Wendel* 43

Tissue carbon dioxide concentrations in rats during acute respiratory acidosis. *Thompson, A. M. and E. B. Brown, Jr.* 49

Effect of breathing O_2 at one atmosphere on O_2 consumption of rats. *Froese, G.* 53

Effects of position on expiratory reserve volume of the lungs. *Craig, A. B., Jr.* 59

Pulmonary resistance and compliance with concurrent radioactive sulfur distribution in dogs breathing $S^{35}O_2$. *Balchum, O. J., J. Dybicki and G. R. Meneely* 62

Effects of oxygen inhalation on cold pressor responses of man. *MacCanon, D. M.* 67

Correlation of pulmonary function and domestic microenvironment. *Shephard, R. J., M. E. Turner, G. C. R. Carey and J. J. Phair* 70

A method for continuous recording in vivo of blood oxygen tension. *Kreuzer, F., E. D. Harris, Jr. and C. G. Nessler, Jr.* 77

Effect of digitalis glycosides in paroxysmal pulmonary edema. *Testelli, M. R., S. Musiker and A. A. Luisada* 83

Effect of pulmonary artery occlusion upon end-tidal CO_2 tension. *Julian, D. G., D. M. Travis, E. D. Robin and C. H. Crump* 87

Mechanical properties and dimensions of the major pulmonary arteries. *Patel, D. J., D. P. Schilder and A. J. Mallos* 92

Physiological actions of diethylstilbestrol in lambs fed varying levels of protein and energy. *Preston, R. L. and W. Burroughs* 97

Salivary glands as endocrine organs. *Godlowski, Z. Z. and J. C. Calandra* 101

Renal clearance and plasma protein binding of oxytetracycline in man. *Kaplan, S. A., A. M. Yuceoglu and J. Strauss* ... 106

Adrenolytic and sympatholytic action of certain dihydrogenated ergot alkaloids (Hydergine) on dog kidney. *Kubicek, W. G.* 109

Total and partial gas tensions of human bladder urine. *Hong, S. K., J. W. Boylan, A. M. Tannenberg and H. Rahn* 115

Seasonal variation in human amino acid excretion. *Hale, H. B., J. P. Ellis, Jr. and D. D. Van Fossan* 121

Influence of certain urinary solutes on acidic dissociation constant of ammonium at 37°C. *Bank, N. and W. B. Schwartz* 125

Small volume perfusion system of the isolated rat liver. *Burton, S. D., S. St. George and T. Ishida* 128

Obesity, age and gastric hunger contractions. *Koch, C. R. and A. J. Stunkard* 133

Pitfalls of the continuous histamine test for gastric secretory inhibition. *Shapira, D., C. Cross, L. Morgenstern and D. State* 135

Replicability of measurements of density of the human body as determined by underwater weighing. *Durnin, J. V. G. A. and A. Taylor* 142

Serum lipoprotein statistics in populations and individuals. *Tamplin, A. R. and R. K. Tandy* 145

Finger numbness after acute local exposure to cold. *Morton, R. and K. A. Provins* 149

Tactile discrimination and skin temperature. *Provins, K. A. and R. Morton* 155

Effects of a short period of training of varying severity on some measurements of physical fitness. *Durnin, J. V. G. A., J. M. Brockway and H. W. Whitcher* 161

SPECIAL COMMUNICATIONS

Relationship between frequency-dependent compliance and unequal ventilation. *Defares, J. G. and P. G. Donleben* .. 166

Effect of 'unilateral hypoxia' on pulmonary blood flow distribution in normal subjects. *Defares, J. G., G. Lundin, M. Arborelius, Jr., R. Stromblad and L. Svanberg* .. 169

A respiration apparatus for C^{14} studies on sheep and dogs. *Luick, J. R., M. Kleiber and J. J. Kaneko* 175

Distortion of indicator-dilution curves by sampling systems. *Milnor, W. R. and A. D. Jose* 177

Technique for establishment of a rumen pouch. *Komarek, R. J., E. C. Leffel, W. H. Brown and K. R. Mason* 181

Pulse wave velocity through polyethylene tubing. *Van Citters, R. L.* 184

Use of dog lymph and dog serum as suspending media for measurement of tissue respiration and glycolysis. *Silk, M. H. and I. J. C. Macintosh* 186

No. 2. MARCH 1960

Cerebral metabolism in problem drinkers under the influence of alcohol and chlorpromazine hydrochloride. *Sutherland, V. C., T. N. Burbridge, J. E. Adams and A. Simon* 189

Caloric expenditure of normal and obese subjects during standard work test. *McKee, W. P. and R. E. Bolinger* .. 197

Correlation of heat output and blood flow in the finger, especially in cold-induced vasodilation. *Edwards, M. and A. C. Burton* 201

Temperature distribution over the human head, especially in the cold. *Edwards, M. and A. C. Burton* . . . 209

Effects of high and low humidity on heat exchanges of lightly clothed men. *Iampietro, P. F. and E. R. Buskirk* . . . 212

Mathematical analysis of the time course of alveolar CO_2. *Yamamoto, W. S.* . . . 215

Breath holding during and after muscular exercise. *Åstrand, P.-O.* . . . 220

Determination of oxygenated, mixed venous blood CO_2 tension by a breath-holding method. *Knowles, J. H., W. Newman and W. O. Fenn* . . . 225

Dimensional responses of bronchi in apneic dogs to airway pressure, gases and drugs. *Kilburn, K. H.* . . . 229

Attempt to demonstrate the distribution component of the alveolar-arterial oxygen pressure difference. *Haab, P., J. Piiper and H. Rahn* . . . 235

Pulmonary vascular resistance and vascular transmural gradient. *Lloyd, T. C., Jr. and G. W. Wright* . . . 241

Flicker fusion thresholds in control subjects and identical twins. *Murawski, B. J.* . . . 246

Respiratory and cardiovascular alterations during the process of anoxic death in the newborn. *Cassin, S., H. G. Swann and B. Cassin* . . . 249

Hypoxemia due to venous admixture in cirrhosis of the liver. *Williams, M. H., Jr.* . . . 253

Spontaneous variations in venous tone in man. *Quiroz, A. C., G. E. Burch and G. E. Malaret* . . . 255

Reflections in model and arterial pulse waves. *Evans, R. L., K. F. Hosie, R. H. Kooiker, J. Perry and R. J. Stish* . . . 258

Changes in foot volume and capillary fragility during continuous cold exposure and starvation. *Norman, P. S., M. B. Kreider and P. F. Iampietro* . . . 261

Ionic charges of glass surfaces and other materials, and their possible role in the coagulation of blood. *Hubbard, D. and G. L. Lucas* . . . 265

Effect of acceleration on blood creatine, creatinine and inorganic phosphorus in man. *Slonim, A. R.* . . . 271

Effect of streptokinase, epinephrine and plasmin on the paroxysmal nocturnal hemoglobinuria serum hemolytic system. *Auditore, J. V.* . . . 275

Effect of sleep deprivation on plasma 17-hydroxycorticosteroids. *Murawski, B. J. and J. Crabbé* . . . 280

Tongue, hyoid and larynx displacement in swallow and phonation. *Shelton, R. L., Jr., J. F. Bosma and B. V. Sheets* . . . 283

Effect of exercise, immobilization and intermittent stretching on strength of knee ligaments of albino rats. *Rasch, P. J., R. Maniscalco, W. R. Pierson and G. A. Logan* . . . 289

Use of the restrained rat technique for study of the antiulcer effect of drugs. *Hanson, H. M. and D. A. Brodie* . . . 291

Secretion from human submaxillary gland after section of the chorda tympani. *Laage-Hellman, J.-E. and B. C. R. Strömblad* . . . 295

SPECIAL COMMUNICATIONS

Adaptation of the gas adsorption chromatographic technique for use in respiratory physiology. *Jay, B. E. and R. H. Wilson* . . . 298

Isolation and injection of selected arterial areas in the brain. *Himwich, W. A., E. Costa, R. G. Canham and S. L. Goldstein* . . . 303

Multifield centrifuge for life-long exposure of small mammals. *Walters, G. R., C. C. Wunder and L. Smith* . . . 307

Rapid determination of deuterium oxide in biological fluids. *Turner, M. D., W. A. Neely and J. D. Hardy* . . . 309

An EKG lead for exercising subjects. *Geddes, L. A., M. Partridge and H. E. Hoff* . . . 311

A tonometric apparatus for constant flow gas equilibration. *Hall, F. G.* . . . 312

New device for esophageal motility studies. *Vantrappen, G., R. Sneppe and J. Vandenbroucke* . . . 314

Intermediate compound hypothesis in relation to dissociation curve data measured in vivo. *Fenne, D. W. and G. G. Nahas* . . . 315

Application of a photoconductive cell to the study of peripheral circulation in limbs of animals and man. *Weinman, J., C. Bicher and D. Levy* . . . 317

Respiration measurements in mice. *Ekberg, D. R. and H. E. Hance* . . . 321

Indirect method for blood pressure determination in the dog. *Prioli, N. A. and M. M. Winbury* . . . 323

No. 3. MAY 1960

Control of respiratory frequency. *Mead, J.* . . . 325

Principles of the Bohr integration procedure and application to measurement of diffusing capacity of the lung for oxygen. *Briehl, R. W. and A. P. Fishman* . . . 337

Velocity of muscle shortening as a limiting factor in respiratory air flow. *Agostoni, E. and W. O. Fenn* . . . 349

Mechanical work of breathing during muscular exercise. *Margaria, R., G. Milic-Emili, J. M. Petit and G. Cavagna* . . . 354

Mechanical efficiency of breathing. *Milic-Emili, G. and J. M. Petit* . . . 359

Dead-space ventilation as a determinant in the ventilation-perfusion concept. *Ross, B. B. and L. E. Farhi* . . . 363

Effect of negative intra-alveolar pressure on pulmonary diffusing capacity. *Cotes, J. E., D. P. Snidal and R. H. Shepard* . . . 372

Compliance of the respiratory system and its components in health and obesity. *Naimark, A. and R. M. Cherniack* . . . 377

Respiratory dead space and arterial to end-tidal CO_2 tension difference in anesthetized man. *Nunn, J. F. and D. W. Hill* . . . 383

Effect of carbonic anhydrase inhibition on mixed venous CO_2 tension in anesthetized dogs. *Cain, S. M. and A. B. Otis* . . . 390

Carbon dioxide buffering in man. *Berman, L. B., T. F. O'Connor and P. C. Luchsinger* . . . 393

Effect of hypothermia on ventilatory response to carbon dioxide inhalation and carbon dioxide infusion in dogs. *Salzano, J. and F. G. Hall* . . . 397

Carbon monoxide diffusing capacity in normal male subjects, age 20–60, during exercise. *Hanson, J. S. and B. S. Tabakin* . . . 402

Distribution of blood flow and ventilation-perfusion ratio in the lung, measured with radioactive CO_2. *West, J. B. and C. T. Dollery* . . . 405

Regional variations in uptake of radioactive CO in the normal lung. *Dollery, C. T., N. A. Dyson and J. D. Sinclair* . . . 411

Venous admixture in the pulmonary circulation of anesthetized dogs. *Finley, T. N., C. Lenfant, P. Haab, J. Piiper and H. Rahn* . . . 418

Cardiovascular adjustments in dogs during continuous pressure breathing. *Lenfant, C. and B. J. Howell* . . . 425
